

SEASIDE

Flexible spaces, smart solutions

Today, work is no longer related to a fixed location. Environments change, needs evolve and the comfort has to be with us everywhere.

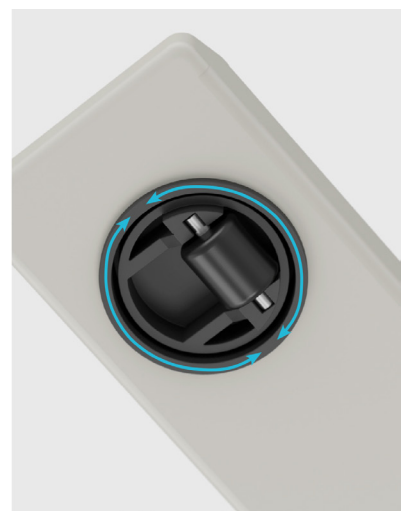

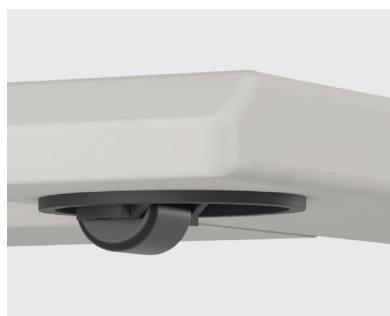

From this awareness, **FLEXI-DESK** takes shape: the new sit-stand desk, designed to be with you anywhere with style, functionality and ergonomics.

Compact, functional, always ready for use

FLEXI-DESK has been designed for dynamic spaces: from home office to hospitals, from common to the most private and personal areas.

The “C-shaped” structure with an “L-shaped” frame allows **FLEXI-DESK** to easily slide under beds, sofas and soft seatings without cluttering up. The 4 built-in castors are invisible, yet perfect to freely move around, in any context.

The coated MDF worktop, nice to the touch, is resistant, antislip and edgeless. The coated steel frame ensures stability and durability, even in intensive use contexts.

Two surfaces, one idea: ergonomics

The split worktop is the key for its flexibility:

- A fixed side: perfect for personal items, mouse, smartphone or a cup of coffee.
- A tiltable part up to 30°: ideal for writing, reading or easily using an electronic device.

Ergonomics is ensured thanks to the gas system adjustment of 335 mm, easily activated with only one hand by a side lever. The ergonomic knob allows precise and customised adjustments, guaranteeing a correct posture even in the most dynamic workstations.

Your ally for different environments

FLEXI-DESK elegantly fits into any context, thanks to its minimal, compact and functional design. It is ideal for:

- Smart working and home office
- Hospital and healthcare environments
- Creative and flexible workstations
- Common areas and lounges

Whether a smart, mobile and ergonomic worksurface is needed, **FLEXI-DESK** is the answer. And it is always one step ahead.

FLEXI-DESK

Dimensions:

- Width: 680mm
- Depth: 400mm
- Height: 700 - 1035mm

BOXED - £200 RRP

BUILT - £220 RRP
